

masterView

Real Time Display of MXF Wrapped Files

masterView™ has been developed as a versatile Windows player for a wide range of MXF files, including MPEG2, H.264, AS-03 and RDD9. Coming soon is support for AS-02 and AVC-Intra material. Designed for professional users, masterView is perfect in any operational environment for viewing images, checking sound, captions, and control data.

masterView is designed for first level quality control and will provide quick, easy confirmation of every major program element. Prevent costly mistakes and last minute panics.

masterView displays

- ▶ HD 16x9 and SD 4x3 Video
- ▶ Active Format Description
- ▶ Content Advisory
- ▶ Video on a waveform monitor
- ▶ Time code and Program timeline
- ▶ Up to 8 channels of sound including PCM, Stereo and AC3
- ▶ Captions (CEA-608 and CEA-708)

masterView plays a wide range of MXF files, including

- ▶ MPEG-2 Video and H.264 Video
- ▶ PCM Audio and Multichannel AC-3 Audio
- ▶ AS-03, RDD9 MXF Files

Slate Data & Control

Slate metadata is shown in the main video window.

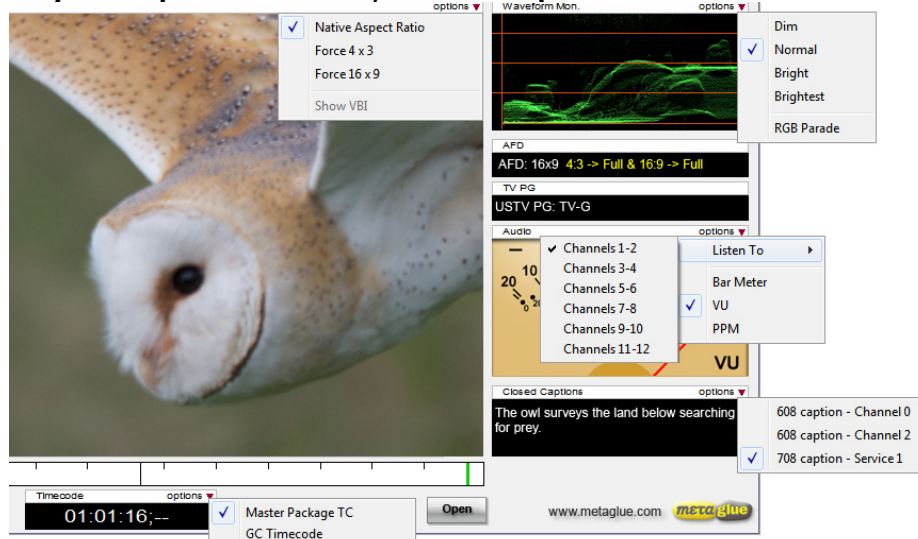

The Slate includes both Parametric Metadata from the MXF header and user-defined Descriptive Metadata

Also included are options to select video, audio and caption components for monitoring.

masterView is part of the Metaglug product range

masterView

Playback Options for Video, Audio & Captions

Drop down options allow you to control which video, audio, caption or timecode components are monitored.

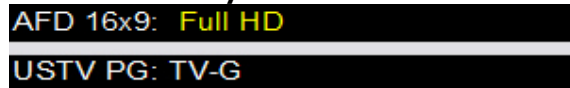

Player control

Replay control is via

- ▶ Timeline display
- ▶ Standard playback controls
- ▶ Jump to the Slate at any point
- ▶ Keyboard shortcuts

Vertical Ancillary Data

Vertical Interval information is visible for

- ▶ Active Format Description (AFD)
- ▶ Content Advisory (XDS-CA)

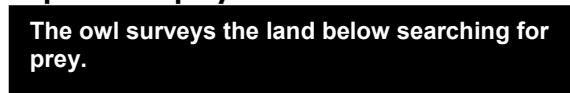

Audio display

Three different standards of audio display-

- ▶ 24 channel bar-graph
- ▶ VU meter
- ▶ PPM (to BBC II A standard)

Captions display

Captions are shown in a separate window to avoid masking of any part of the video image
